

# TOLGA IZDAS

Istanbul, Türkiye | [tolgaizdas@tolgaizdas.com](mailto:tolgaizdas@tolgaizdas.com)  
[github.com/tolgaizdas](https://github.com/tolgaizdas) | [tolgaizdas.com](https://tolgaizdas.com) | [linkedin.com/in/tolgaizdas](https://linkedin.com/in/tolgaizdas)

## EDUCATION

**Bachelor of Science in Computer Engineering**  
*Yildiz Technical University*

- GPA: 3.59/4.0

Expected Graduation: Jun 2025  
Istanbul, Türkiye

## PROFESSIONAL EXPERIENCE

**Software Engineer Intern**  
*Turk Telekom*

Jul – Sep 2024  
Izmir, Türkiye

- Designed a database for the company inventory from scratch using SQLite.
- Implemented an interface and database operations using the Django framework.
- Improved the data retrieval and processing speeds, contributing to more efficient inventory management.

**Software Engineer Intern**  
*SESTEK*

Jul – Sep 2023  
Istanbul, Türkiye

- Developed a product that summarizes provided voice input using JavaScript and API.
- Added a module to a product that allows the user to read sent HTTP data in a web interface.
- Gained insights into agile practices through daily and weekly meetings.

## RESEARCH EXPERIENCE

**Research Scholar**  
*COSMOS AI Research Group*

Jul 2024 – Present  
Istanbul, Türkiye

- Conducting benchmarks on LLMs using few-shot learning.
- Curating datasets for evaluating text generation models and improving their overall performance.
- Fine-tuning LLMs for specific tasks, improving their performance in domain-specific applications.
- Writing and maintaining scripts for automated model evaluation and result analysis.

## PROJECTS

**COSMOS LLM Evaluation Tool**

Jul 2024

- Developed a tool to evaluate LLMs such as GPT, BERT, and LLaMA on a variety of tasks with support for few-shot learning.
- Implemented custom evaluation metrics for accuracy and perplexity.
- Established a modular architecture to allow for easy integration of additional models and evaluation tasks in the future.

**Undergraduate Project: Occupation Prediction from Twitter Data**

Mar 2024

- Developed a project to predict occupations from Turkish tweets using machine learning, deep learning, and NLP.
- Explored the impact of dataset size on model performance, achieving high accuracy in classification tasks.

## PUBLICATIONS

- T. Izdas, H. Iskifoglu, and B. Diri (2024). Occupation Prediction from Twitter Data. *Dokuz Eylul University Faculty of Engineering Journal of Science and Engineering (DEU FMD)*. (Accepted, pending publication)

## SKILLS

**Technologies:** Python, Java, C, SQL, JavaScript, Jupyter Notebook, MATLAB

**Libraries:** TensorFlow, PyTorch, NumPy, Pandas, Keras, scikit-learn, Matplotlib, Apache Hadoop, Django

**Tools:** Git, Google Colab, Hugging Face, Kaggle, PyCharm

## LANGUAGES

**Turkish:** Native

**English:** Advanced | TOEFL iBT: 98/120
